

## ETFS Physical Platinum

### Investment objective

ETFS Physical Platinum (ETPMPT) is designed to offer investors a simple, cost-efficient and secure way to access the precious metals market by providing a return equivalent to movements in the platinum spot price less fees.

### About the security

ETPMPT is a transferable security that can be created or redeemed on demand by market-makers, and that can be redeemed by investors. It trades on exchange as an equity.

ETPMPT is backed by physical allocated metal held by the Custodian (HSBC Bank USA N.A.). All physical platinum metal held with HSBC conform to the London Platinum Palladium Market's (LPPM) rules for Good Delivery.

### Key features

- Tracks the price of platinum, not a portfolio of equities
- Simple to trade on a major stock exchange
- Settled and held in ordinary brokerage accounts
- Transparent tracking with clear pricing
- Backed by physical, allocated metal
- Provides additional portfolio diversification
- Able to short, and margin eligible

### About the pricing

Each individual ETFS Physical Platinum Security has an effective entitlement to and that entitlement changes daily to reflect the accrual of the management fee. Authorised participants create and redeem securities by delivering or receiving platinum that conforms to the LPPM good delivery standards. ETFS Physical Platinum securities are traded on exchange with a price that is based on the spot price of platinum multiplied by the applicable metal entitlement.
