

# The Dow Jones-UBS Commodity Index<sup>SM</sup> Family

The Dow Jones-UBS Commodity Index<sup>SM</sup> (DJ-UBSCI<sup>SM</sup>) is a broadly diversified index that allows investors to track commodity futures through a single, simple measure. The index is composed of futures contracts on physical commodities. As the index has grown in popularity since its introduction in 1998, additional versions and a full complement of subindexes have been introduced. Together, the family offers investors a comprehensive set of tools for measuring the commodity markets.

---

## Dow Jones-UBS Commodity Index<sup>SM</sup> and Dow Jones-UBS Commodity Index Total Return<sup>SM</sup>

The DJ-UBSCI family includes both the DJ-UBSCI, which is calculated on an excess return basis, and the DJ-UBSCITR, a total return index based on the DJ-UBSCI. The former reflects the return of underlying commodity futures price movements only, while the latter reflects the return on fully collateralized positions in the underlying commodity futures.

---

## Dow Jones-UBS Commodity Subindexes<sup>SM</sup>

The DJ-UBSCI family includes nine sector subindexes that group the commodities by type (e.g., the DJ-UBS Grains Subindex<sup>SM</sup> includes Corn, Soybeans and Wheat). The DJ-UBS Ex Energy Subindex<sup>SM</sup> allows investors to track a diversified basket of commodity futures without exposure to energy futures prices. Also available are individual commodity subindexes on the 19 components currently included in the DJ-UBSCI, plus cocoa, lead, platinum and tin. All DJ-UBSCI Subindexes are available in excess and total return versions.

---

## Dow Jones-UBS Commodity Spot Indexes<sup>SM</sup>

The Dow Jones-UBS Commodity Spot Indexes<sup>SM</sup> measure price movements of the commodities included in the DJ-UBSCI and select subindexes. The DJ-UBS Commodity Spot Index provides a general estimate of trends in commodity prices. It does not account for the effects of rolling futures contracts or the costs associated with actually holding physical commodities, and is thus not replicable with positions in the underlying commodity futures contracts.

---

## Dow Jones-UBS Commodity Indexes<sup>SM</sup>: Forward Versions

The DJ-UBSCI family includes 1-, 2-, and 3-Month Forward versions of the DJ-UBSCI and select subindexes. Composed of longer-dated commodity futures contracts, the forward versions allow investors to measure exposure to different parts of the commodity futures curves.

---

## Dow Jones-UBS Commodity Indexes<sup>SM</sup>: Foreign Currency Versions

The DJ-UBSCI and the DJ-UBSCITR are also available denominated in Australian Dollar, Yen, Euro, Swiss Francs and Pounds Sterling.

---

## Dow Jones-UBS Commodity Indexes<sup>SM</sup>: Currency Hedged Versions

The DJ-UBSCI<sup>SM</sup> Currency Hedged Versions measure the performance of commodities futures contracts that trade in a specific currency that is hedged against the U.S. Dollar. Currently available calculated in excess return and total return are: Australian Dollar, Euro, Pound Sterling, Yen and Swiss Franc.

## DJ-UBSCI Single Commodity Subindexes

Dow Jones-UBS Aluminum Subindex<sup>SM</sup>  
 Dow Jones-UBS Cocoa Subindex<sup>SM</sup>  
 Dow Jones-UBS Coffee Subindex<sup>SM</sup>
